Project Title: Exit The Plugin
Team Members:
- Diwakar kumar
- Dixit sharma
- Dixita
- Diya

Goal: Our project aims to deliver a diversity of options to the customer at one site.

Often, customers want more variety on a single page, and our site provides more branded and materialistic things in one place or at one time. It eases the problem for customers by allowing them to search for more varieties in just one place.

- We improved the usability of our website by providing options for users, such as a sign-in button using a button tag.
- Option for exiting our website and a thank-you note for users for using our website.
- We also used the <a> tag for linking the sign-in and exit page to our main page.
- To make our website more interactive, we have also used the <img> tag to show the variety of products.

By using the <div> tag, we were able to exhibit a lot of diversification on a single page.

37             height:50px;
```

Conclusion

This project led us to a marvellous experience in which we learned about the variety of attributes needed to develop a website.
